FLOODPLAIN INFORMATION

Current Condition of Property (i.e. undeveloped, existing structure): _____

Proposed use for Property: _____

Current Floodplain designation of Property: _____ FIRM Panel: _____ Date: ___/___/___

Elevation Certificate of any Existing Structures: _____

Is Any Part of the Property Located in the Floodway: _____ BFE: _____

How was BFE determined: (attach calculations): _____

GENERAL REQUIREMENTS

Residential: Floor elevation must be a minimum 12" above BFE (Base Flood Elevation) at the location of the structure. Crawl spaces must have flood openings to allow water to flow freely in or out of the space. Special consideration must be given to the location of appliances and mechanical components.

Commercial: Floor elevation must be a minimum 12" above BFE at the location of the structure, or the building must be flood proofed to 12" above BFE. Special consideration must be given to the location of appliances and mechanical components.

Grading/Other: An H & H(hydrologic & hydraulic) study will be necessary for most development in the flood plain.

Other requirements may apply depending on the unique circumstances of the property in question.

The information in this assessment is estimated based on available information and is not official documentation of floodplain conditions at this location.
